## PATIENT INFORMATION SHEET COLONOSCOPY

You have been scheduled for an examination of the lower gastrointestinal tract (rectum, colon, or large bowel). This is done by looking at the lining of the large bowel by a lighted tube put into your rectum. In order to examine the colon completely, you will have to follow a special, colon preparation before the test. This will "clean" the bowel out. It is important **not to eat solid food once the preparation has begun**, until after the test. **Stop clear liquids three hours prior** to the procedure.

The morning of the test you will have your blood pressure and pulse checked. Then you will be asked to lie down on the examination table. A small IV catheter will be put into a vein in your arm or hand so that medicine to relax you can be given. The medicine that is usually given is Propofol. Once you are relaxed, the doctor will examine your colon with the colonoscope. The examination usually takes 20 minutes to 1 hour. If abnormalities are seen, biopsies (small pinches of tissue) can be taken through the tube. These biopsies are not painful. The biopsies are then sent to the laboratory for examination by microscope. The endoscope is taken out after the exam is completed. Most patients are awake enough to leave within an hour. However for safety reasons **you cannot drive** or operate dangerous machinery, tools or appliances, until the following day, as the full effect of the medicine wears off slowly. Before you leave, a check-out sheet will be given to you explaining the results of the test.

Possible complications from the test include abdominal pain or cramping, mild bleeding from the rectum and soreness, or redness and/or bruising at the IV site. In addition, more serious complication can occur. These include, but are not limited to, heart or breathing problems which occur in 0.2% of exams, perforation (making a hole in) or tears of the colon occurring in 0.12% of exams, bleeding which occurs in 0.09% of exams, and death, which are rare, occurring in less than 0.006% of exams. If a polyp is removed, the risk of perforation in 0.3% of exams, and bleeding in 1.7% of exams. If any of these complications occur, hospitalization, transfusions, or surgery may be necessary.

**IF YOUR COLONOSCOPY HAS BEEN SCHEDULED FOR SCREENING (MEANING YOU HAVE NO SYMPTOMS WITH YOUR BOWELS)\*, AND YOUR DOCTOR FINDS A POLYP OR TISSUE THAT HAS TO BE REMOVED DURING THE PROCEDURE, THIS COLONOSCOPY IS NO LONGER CONSIDERED A SCREENING PROCEDURE, IT IS CONSIDERED A SURGICAL PROCEDURE AND YOUR INSURANCE BENEFITS MAY CHANGE. PLEASE CHECK WITH YOUR INSURANCE COMPANY PRIOR TO STARTING THE BOWEL PREPARATION.**

Any questions you have about this examination or its possible complications should be discussed with the doctor before the exam begins.

If you are on a prescribed blood thinner medication and are unclear about when to stop your medication, please contact our office for further clarification at 435-673-1149.

Please bring someone with you **to drive you home**, as you will be sedated for the exam. **By law, you cannot drive the rest of the day of the colonoscopy.** The doctor will talk to you after the exam and will give you recommendations for diet, medication, follow up care, etc. Wear comfortable clothes, bring your glasses, hearing aids, insurance card(s) and completed forms. We will expect payment of co-pays, coinsurance and/or deductible at the time of service. If you have any questions please call (435) 673-1149 or visit our website [www.utahgastro.com](http://www.utahgastro.com)

Anesthesia Services Offered at St. George Endoscopy Center

---

St. George Endoscopy Center utilizes anesthesia services provided by a Certified Registered Nurse Anesthetist (CRNA), who is highly trained and specialized to safely administer your sedation. The CRNA will carefully deliver medications while monitoring your vital signs during your procedure. Based upon your medical history and condition, your physician will work in consultation with the CRNA to determine the best type of sedation to administer, customized just for you. Please note that the charge for anesthesia services are separate from and in addition to routine charges for endoscopic services rendered by your physician, the surgery center, and pathology charges (biopsies, if taken). These charges are generally covered by your health insurance policy. In the event that your insurance will not cover anesthesia services for your endoscopic procedure, alternative self payment arrangements for this important services can be made with AmSurg St. George Anesthesia, LLC

\_\_\_\_\_ (Initial Here) I agree to receive anesthesia services as recommended by my physician, and I acknowledge that my insurance will be billed and I will be responsible for payment of any deductibles and co-insurance.

*Non Coverage of anesthesia for services provided*

\_\_\_\_\_ (Initial Here) I am aware that my insurance company may not cover this service and I acknowledge that I will be billed the following fees if my insurance company denies payment. \$200 self-pay rate flat fee for anesthesia services will be billed to the patient.
